

Wheelie bin without logo

ASSEMBLY GUIDE

If your bin doesn't come ready assembled, it will have all the parts stored inside.

1 Bin without Logo

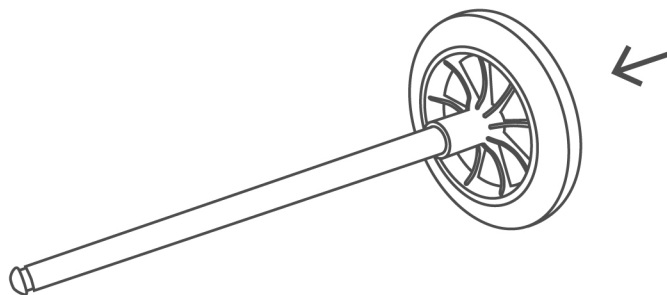

2 Bin Lid

3 Two Wheels

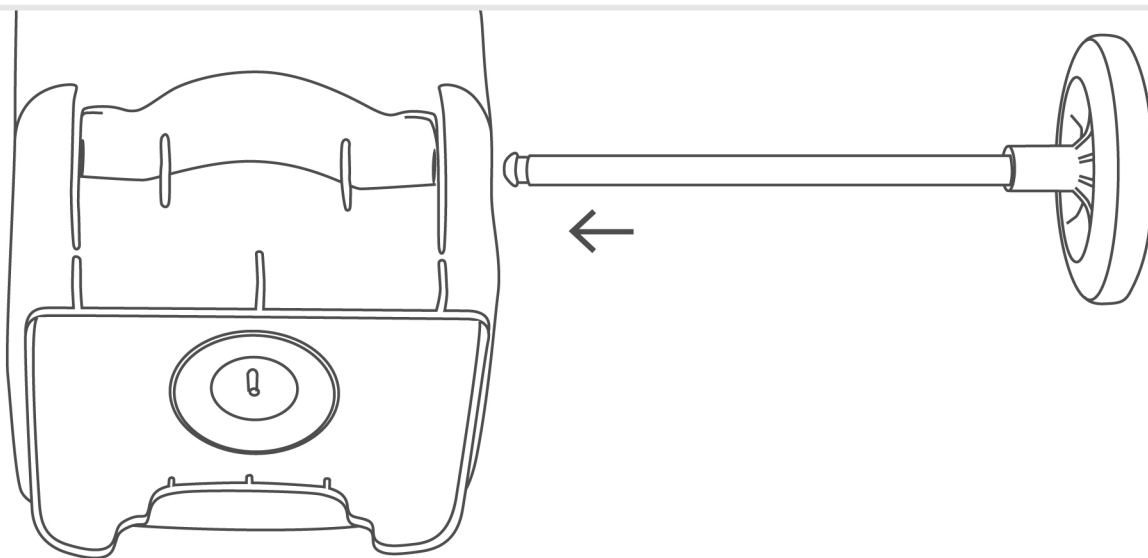

4 Metal Pole

5 Flat Head Screwdriver
(not included)

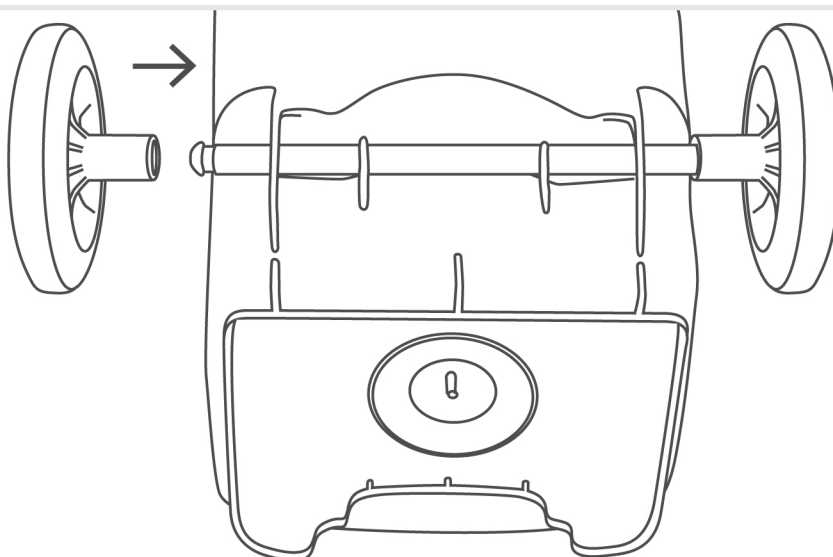

Wheelie bin without logo

Push a wheel onto the metal pole until you hear a click. (This may take a bit of force)
Note: It is important to only fit one wheel at this stage.

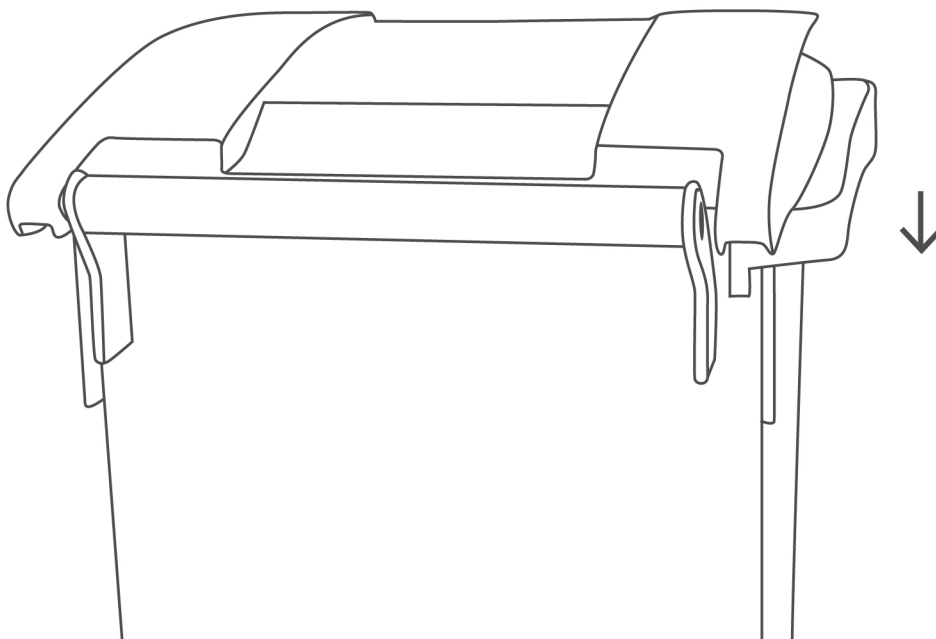

Thread the pole with one wheel attached through the holes in the bottom of the bin.

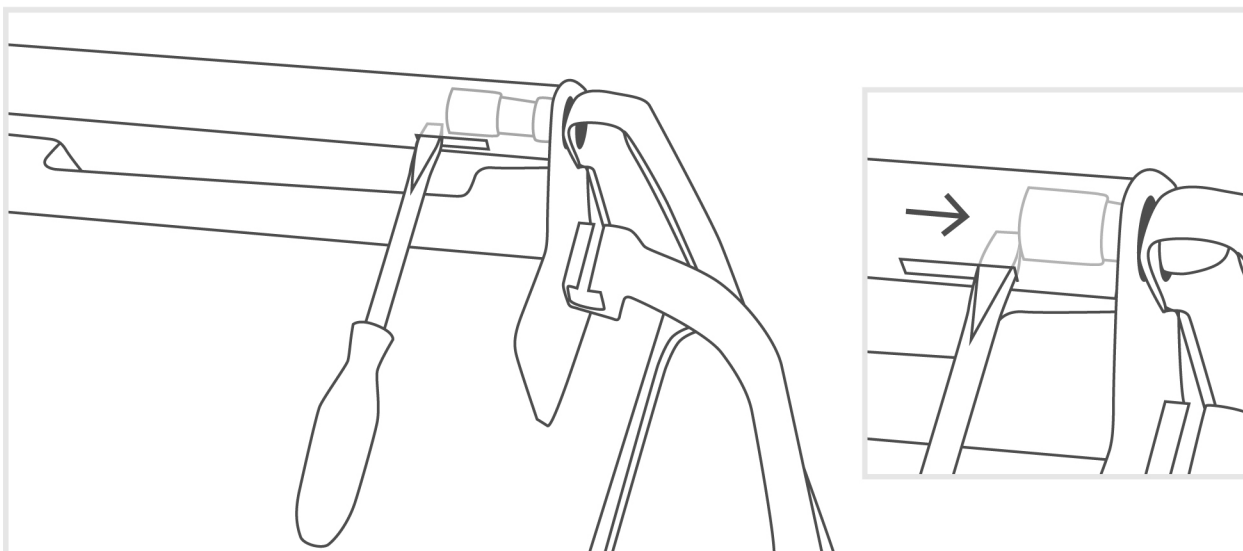

Attach the other wheel. If on correctly, the wheels should not slip off either end.

Wheelie bin without logo

Place the lid into position on top of the bin, aligning the holes on either side with the holes in the handles.

Insert a flat head screwdriver into the handle and push the in-built pins into the bin lid on both sides. Once finished, the lid should be able to open and close without coming loose and the wheels should stay sturdy when moved.
