# **EURO SLIDE**

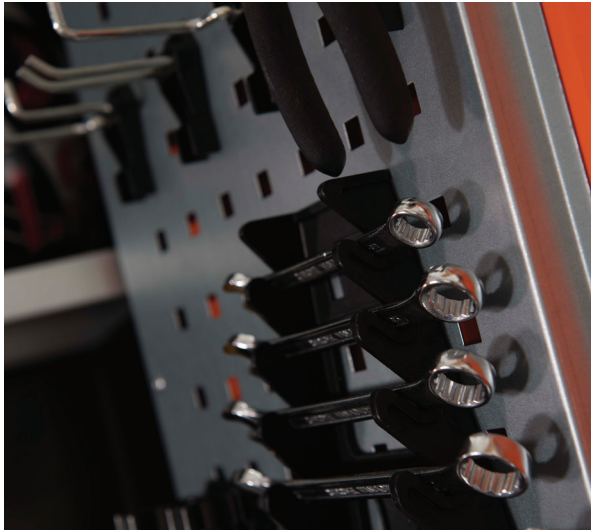

**MANUFACTURED SINCE 1980**

The Euroslide range of cabinets has been manufactured in the West Midlands, UK since the early 1980s. During these four decades Euroslide has been the choice of many of the UK's leading companies, universities, hospitals and museums. Customer's have included Rolls Royce, Airbus, JLR and most recently Eurotech Racing. This year has seen a total revamp, improvement and extension to this highly popular drawer storage equipment range.

WORKSHOP DESIGN

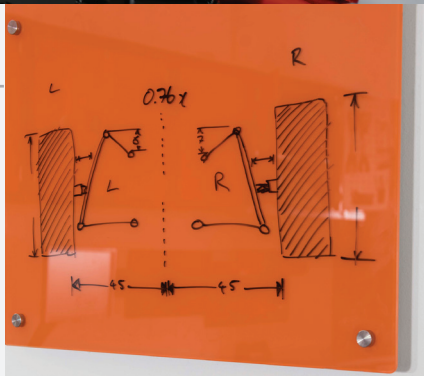

## STORAGE SOLVED

The Euroslide range is designed by engineers for engineers. At the forefront of design was quality, customisation, durability and longevity. The Euroslide range isn't limited to drawer cabinets, it can encompass all your storage needs. From tall and over head cupboards, to lockers, small parts storage systems, tool trolleys and much more we can make your ideas a reality.

## FROM CONCEPT TO CREATION

Whatever you're concept, no matter how big or small - nothing is impossible. At Direct2U we embrace individuality and whenever possible we like to offer a bespoke solution. We not only design around your practical requirements, we like to consider colour pallets and finishing touches. Whether it is creating your storage in corporate colours, or sourcing accessories which complement your chosen scheme, no detail is too small.

# PROJECT

## SERVICE & SITE SURVEY

We offer site surveys so that you can discuss your requirements on a one-to-one basis. This gives us opportunity to view and get a feel for your work environment, enabling us to suggest the most appropriate product selection.

Once we have completed the site survey we are able to draw floor plans including CAD designs, 2D and 3D renders, giving you chance to envisage what your space could be transformed into. It is important to us that at every stage of the process you feel your requirements are being met. We ensure we see every project through from inquiry to installation.

**MULTIPLE**  
CONFIGURATIONS

# STATIC DRAWER CABINETS

High quality Euroslide drawer cabinets manufactured from 0.9mm gauge steel. Available in multiple drawer / cupboard configurations to suit a range of storage needs. Huge 100kg load capacity per drawer, fitted with full extension precision ball race slides for smooth action. Safety anti-tilt feature prevents more than one drawer being opened at one time.

# MOBILE DRAWER CABINETS

Mobile drawer cabinets fill the void between storage and working projects, making it possible to take essential tools and parts to your work. Fitted with two swivel castors at the front of the unit and two fixed castors at the rear for ease of movement, with two handles on one side making transportation effortless no matter what the weight load.

# UNDER BENCH DRAWER CABINETS

No space for mobile drawer cabinets? The under bench cabinet is the perfect solution. Designed to fit underneath work surfaces, but can be pulled out and taken to your work area as and when needed. Fitted with two swivel castors at the front of the unit and two fixed castors at the rear for effortless positioning and movement back and forth.

# DRAWER CABINETS ON STANDS

Cabinets on stands are a practical solution for environments where oil and grease are used. By raising the cabinets off the floor, the stands allow for easy maintenance and cleaning. Available in 600 and 900mm wide versions, so that you can create a run of drawer cabinets to suit your storage requirements. All drawers have a 100kg load capacity and are mounted on telescopic ball race slides with anti-tilt feature to prevent more than one drawer opening at a time.

# 1200 HIGH DRAWER CABINETS

These super-sized drawer cabinets offer high volume storage. They are available in numerous configurations from single cupboards to cabinets with 11 drawers per unit. They can be used to create taller workstations, to offer an alternative working position, or can be placed next to each other to segregate work areas. Each drawer has a 100kg load capacity and cupboard doors are fitted with peg boards on the inside to utilise every inch of available space.

# SYSTEMTEK WORKBENCHES

SYSTEMTEK has been designed around functionality. The concept was to prioritise production and efficiency, resulting in practical tool storage with above accessories including peg boards, lighting, service ducts and shelving. So that whether it is access to power, tools or parts everything is at your finger tips. The range is available in 600, 900, 1200, 1500 and 1800mm wide versions with multiple drawer configurations and positions, enabling each workstation to be made bespoke to your requirements.

# EUROSLIDE TOOL TROLLEYS

If you find yourself moving large parts, equipment and tools in between work areas, then let our Euroslide trolleys bear the load. Combining shelf, drawer and cupboard storage, each trolley can be adapted and manufactured to your requirements. The design enables you to utilise all possible space, including the top shelf/work surface. The trolleys can be fitted with Beech, Laminate or Steel worktops or with a tray and sloping top option, creating a truly fully mobile workstation.

# SYSTEM FLOW TROLLEYS

SYSTEM FLOW trolleys have been designed to provide high capacity storage particularly for hand tools and small parts. These trolleys can be taken to your work area, reducing the time spent going back and forth to other tool storage, making your time more efficient. The perforated panels are used with plastic accessories, to ensure tools are easily accessible and quickly identified if missing. SYSTEM FLOW trolleys are available to purchase in complete kits or you can design and build your own with our individual components.

# SYSTEM FLOW TROLLEYS

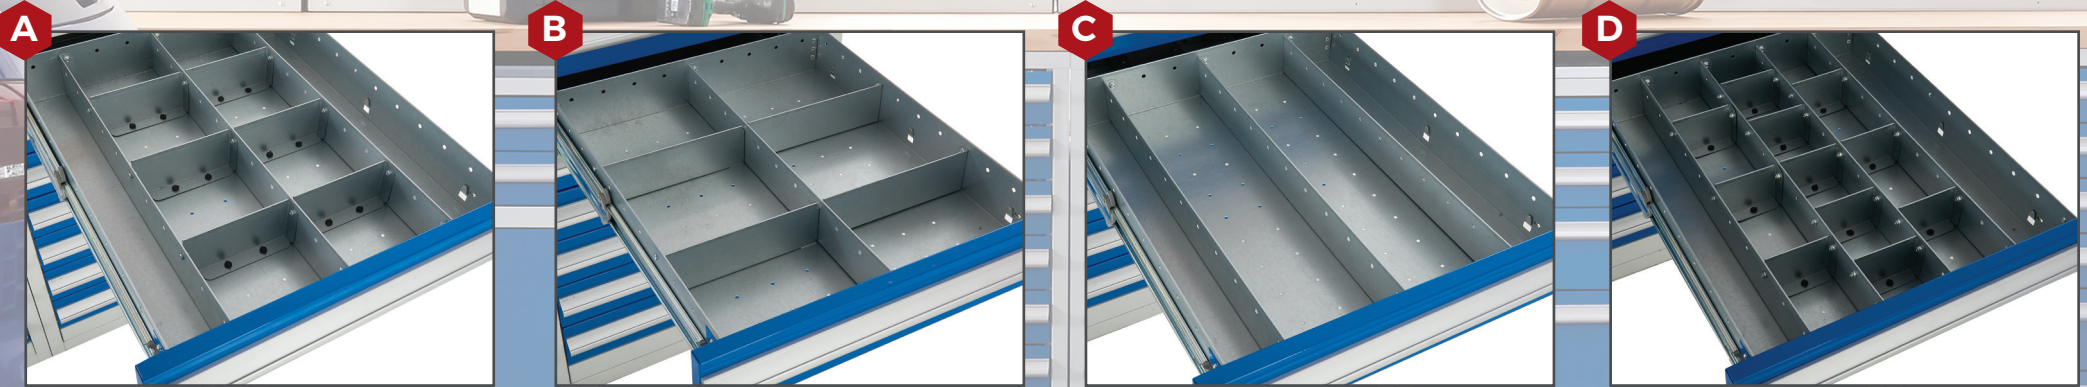

SYSTEM FLOW trolleys can come in all shapes and sizes. The range also includes Tilting Shelf Trolleys, Shelf & Panel Trolleys, IT Trolleys and Tool Panel Trolleys. With a whole range of accessories to choose from such as drawers, service ducts, adjustable bin rails and clip and hook kits, these trolleys are completely customisable. They are designed to provide mobile storage for essential equipment and tools, but can also be used to display technical drawings and work schedules.

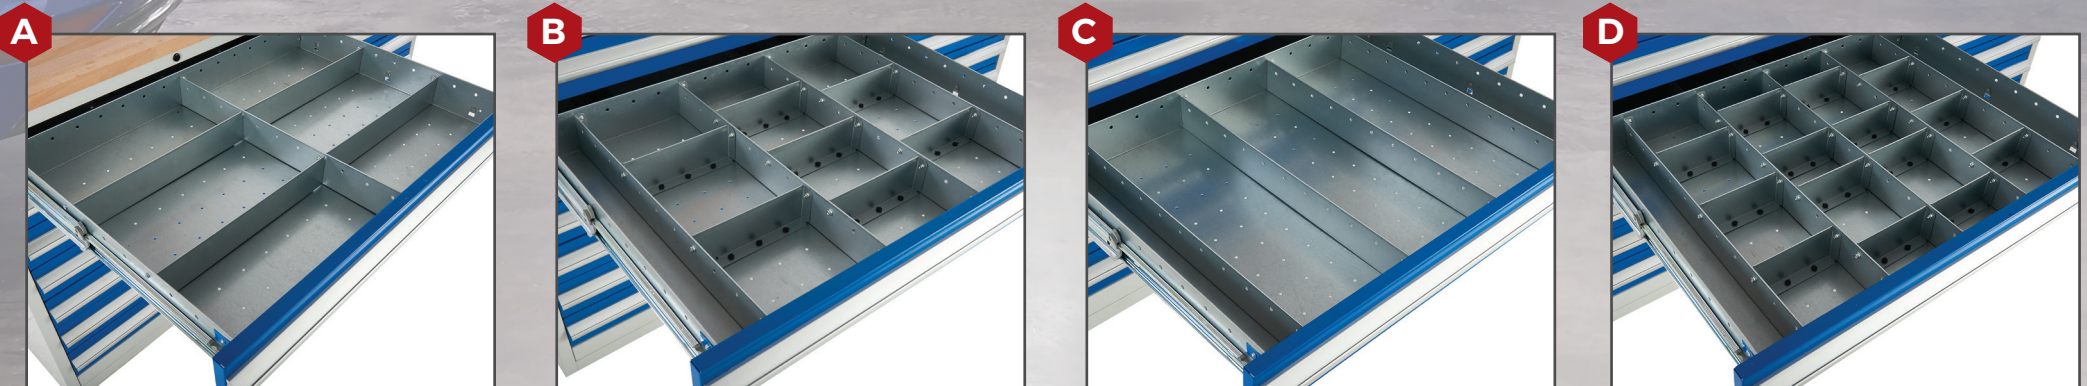

# DRAWER DIVIDERS & INSERTS

A complete range of drawer divider and inserts are available to enable you to create unique compartment sizes within the drawers for small parts and tools. Dividers are fixed to the base of the drawer using durable plastic rivets. The sides are bolted together using standard nuts and bolts which gives the dividers a little more sturdiness. Drawer divider and insert kits are supplied with a screwdriver and 10mm spanner for quick and easy assembly.
