

## ASSEMBLY GUIDE

If your bin doesn't come ready assembled, it will have all the parts stored inside.

1 Bin with Logo

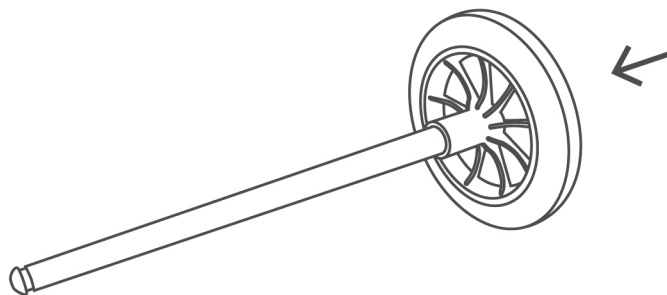

2 Bin Lid

3 Two Wheels

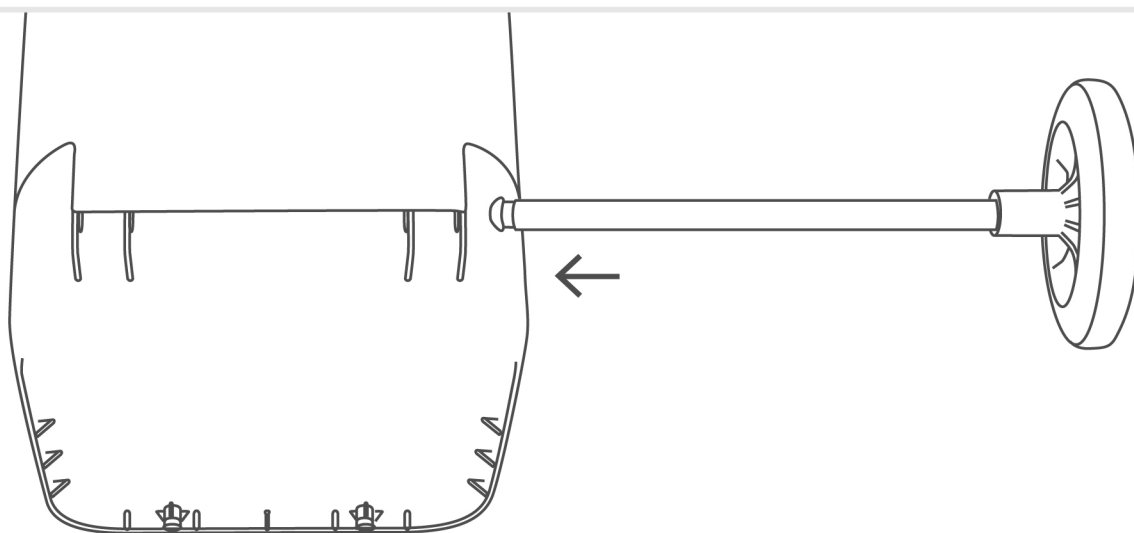

4 Two Lid Plugs

5 Metal Pole

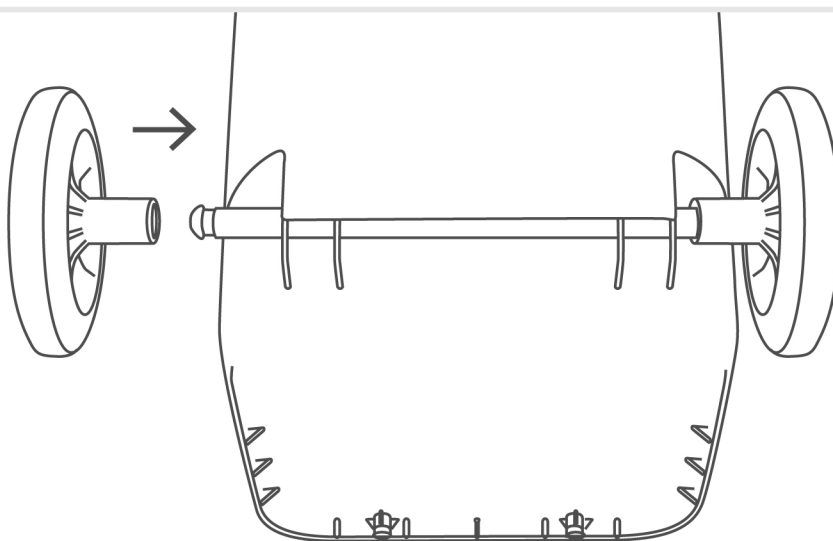

# Wheelie bin with logo

Push a wheel onto the metal pole until you hear a click. (This may take a bit of force)  
Note: It is important to only fit one wheel at this stage.

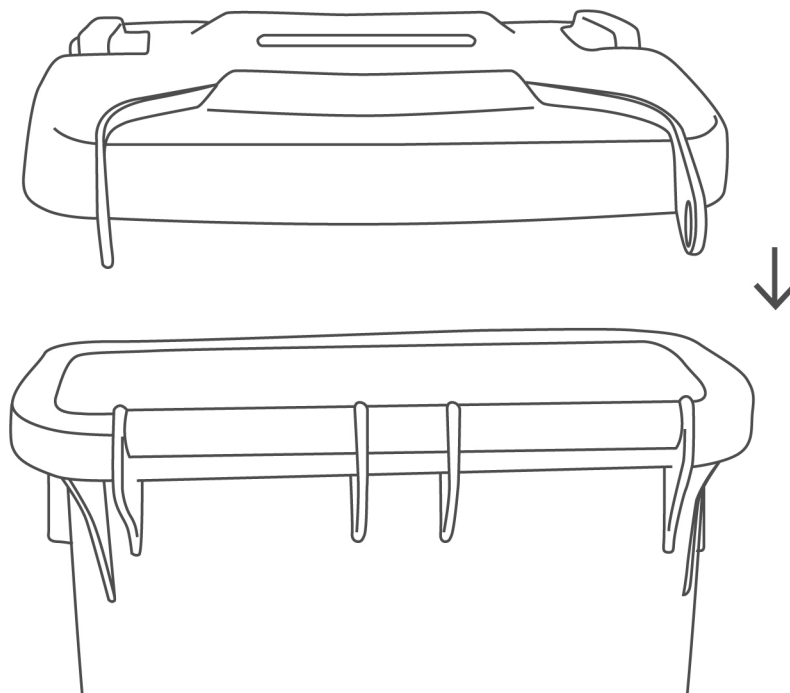

Thread the pole with one wheel attached through the holes in the bottom of the bin.

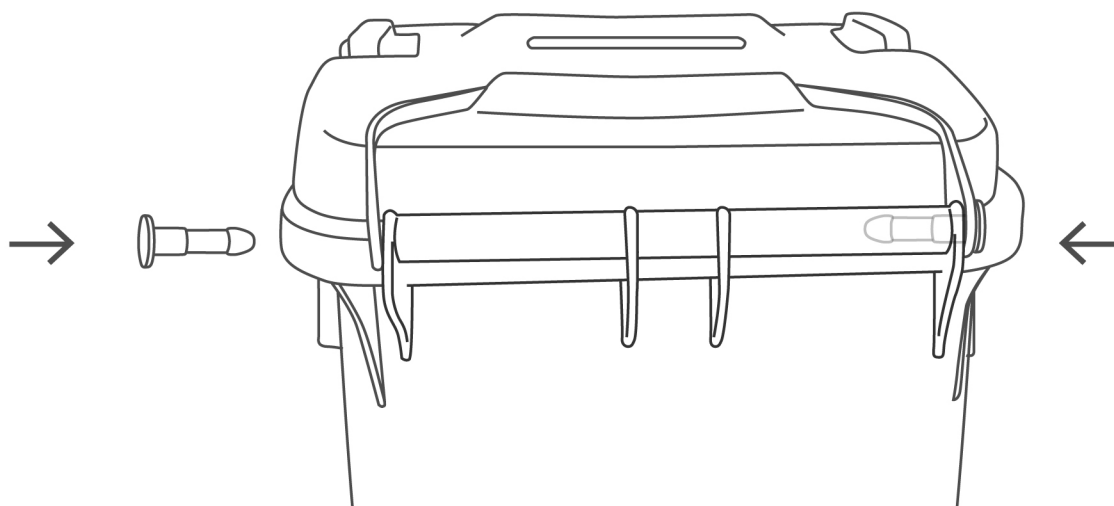

Attach the other wheel. If on correctly, the wheels should not slip off either end.

# Wheelie bin with logo

Place the lid into position on top of the bin, aligning the holes on either side with the holes in the handles.

Place the plugs into holes and push until completely inserted. Pins should go in fully. (This may take a bit of force) Once finished, the lid should be able to open and close fully without coming loose and the wheels should stay sturdy when moved.

If you require any further assistance, you can call us or watch our Wheelie Bin Assembly Video online
